Sales Management

Scan-N-Quote

Features

- Provides showroom floor scanning capability.
- Simple and easy to use.
- Scans Tag-N-Trak item numbers from printed tags with Tag-N-Trak barcodes.
- Captures item number, room location and quantity.
- Review items by scrolling through scanned database.
- One quote per scanning session.
- Handheld initiated transfer to server.
- Upload from any handheld data station in seconds.
- Scanned data copied to server for quotation 'load'.
- Quotation 'load' works like entering a quote.
- Price override, item change, note, related item, special order, and non-stock functions all available in quote.
- Quote available for immediate print after 'load'.
- Quote MUST be converted to an order before inventory is reserved.

Benefits

- Accurate capture of item numbers.
- Allows more time for customer interface.
- Easy "on-the-spot" changes.
- Gets printed quote to customer fast.
- Eliminates entry mistakes for keyboard challenged sales people.
- Reduces customer 'wait' time.
- Builds customer confidence in your 'state-of-the-art' business.
- No 'reserved' inventory until quote accepted by customer.
- No 'special orders' until quote accepted by customer.

Count Management

Scan-N-Count

Features

- Provides counting of physical inventory items.
- Scans Tag-N-Trak item numbers from Tag-N-Trak hangtags, shelf or carton labels.
- Imports data and updates physical inventory counts.
- Standard inventory reports produce updated inventory valuations.
- Saves hours of counting time.
- Saves keyboard and transcription errors.

Benefits

- Accurate capture of item numbers.
- Takes less time per count team; faster counts, mean less co\$.
- Easy "on-the-spot" changes.
- Gets scanned count to the computer fast.
- Eliminates entry mistakes for keyboard challenged operators.
- Reduces count team 'wait' time.
- Builds employee confidence in your 'state-of-the-art' business.

Scan - N - Trak SYSTEM

Complementary Products for Tag - N - Trak

Modules

Planned

Sales Management

Scan-N-Sell [planned]

Planned development to provide some facilities of SCAN-N-QUOTE, plus manual pricing input through the scanner and easier 'loading' to invoice. Scans Tag-N-Trak item numbers from printed tags

Count Management

Scan-N-Display [planned]

Planned development to provide display/showroom counting by facility location and updating of counts on display/showroom 'orders'. Special reports show differences and adjustment quantities as well as display/showroom item location [optional]. Scans Tag-N-Trak item numbers from printed tags

Delivery Management

Scan-N-Pick [planned]

Planned development provides for 'loading' order into handheld scanner for picking assistance and confirmation of items picked. May make adjustments to open order before closing/invoicing. Scans Tag-N-Trak item numbers from printed tags, shelf or carton labels.

Scan-N-Load [planned]

Planned development provides for 'loading' picked order into handheld scanner for confirmation of items loaded onto truck. May include optional signature capture and on-site delivery ticket printing. Warns of necessary adjustments to open order before closing/invoicing/delivery. Scans Tag-N-Trak item numbers from printed tags, shelf or carton labels.

Stock Management

Scan-N-Receive [planned]

Scans items for receiving and check in after labeling. Reports information to purchasing receiving module.

Scan-N-Xfer [planned]

Scans items for picking and receiving on intra-company stock transfers.

Scan-N-Warehouse [planned]

Scans item locations as received items are put away. Tracks backup stocking locations for items.
